# Introduction

The expanded and updated 20 states' district-level database includes data on key agriculture and socio-economic variables from 1990 to 2015. This documentation is for the updated unapportioned database.

The database builds on the previous ICRISAT district-level database of 13 states (Andhra Pradesh, Gujarat, Haryana, Karnataka, Madhya Pradesh, Maharashtra, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh, Bihar, West Bengal and Odisha) and an additional 3 states (Assam, Himachal Pradesh and Kerala), 3 newly formed states in 2000 (Chhattisgarh, Jharkhand and Uttarakhand) and Telangana formed in 2013. The previous database was created with funding support from ICRISAT, World Bank, System Wide Livestock Program (SLP-CGIAR) in collaboration with National Institute of Agricultural Economics and Policy Research (NIAP), a think tank of the Indian Council of Agricultural Research (ICAR), New Delhi.

The update being jointly carried out by ICRISAT and Tata Cornell Institute (TCI) includes data for all districts in 20 states until 2017. It includes data on crop area and production, irrigated area, monthly rainfall and livestock and, operational holdings and population census data, and selected socio-economic and agro-ecological variables. Additionally, the scope of the database has been expanded to include data on soft infrastructure related to education, health, nutrition and credit. Data on environmental variables like temperature, Actual Evapotranspiration (AET), Potential Evapotranspiration (PET), etc., was generated using pixel-level data from Terra Climate database. A web-based interactive tool (with a dashboard and spatial maps) has been created to add value to the database that will allow quick access to and extraction of information.

The database is divided into two datasets, apportioned with only the 1966 base districts and unapportioned which includes all the districts formed until 2017 in 20 states of India. This database relates to the district boundaries prevailing in 2017 and includes 592 districts. A list of districts by state as on 2017 is given in Appendix 1.

The current documentation includes a list and description of data files, data clarification and anomalies, available and missing data and data sources. The data are stored in an Excel spreadsheet. The compilation, computerization, proof reading and subsequent validation of raw data were extremely time consuming; so was matching data from different states and sources. Despite our efforts, several anomalies remain in the database and are highlighted in the section on 'Data clarification and anomalies'.

Users are urged to bring to our notice any glaring data inconsistencies so that improvements can be made to its quality and also read the documentation carefully prior to using the data, particularly the sections on 'Data clarification and anomalies' and 'Missing data'.

Several data sources were utilized to compile this database. Many times, staff working on this project had to visit state Directorates of Agriculture and state Bureaus of Economics and Statistics, Department of Animal Husbandry, Department of Horticulture. The support and cooperation extended by these organizations is highly appreciated, but for which this database would not have been completed.

# 1. File Groups and Data Files Included in the Database

The database is divided into the following file groups and stored in Excel spreadsheet.

<b>File groups and data files</b>	
<b>I</b>	<b>Crops</b>
1	Area, production and yield (APY)
2	Area under high yielding varieties (cereals)
<b>II</b>	<b>Irrigation</b>
1	Crop-wise
2	Source-wise
<b>III</b>	<b>Biophysical</b>
1	Land use
2	Monthly rainfall
3	Normal rainfall
4	Soil type <sup>1</sup>
5	Length of growing period (LGP) <sup>1</sup>
<b>IV</b>	<b>Inputs</b>
1	Fertilizer consumption
2	Seasonal fertilizer consumption
<b>V</b>	<b>Prices</b>
1	Farm harvest prices (FHP)
<b>VI</b>	<b>Census</b>
1	Population
2	Livestock
3	Crossbred and indigenous cattle
4	Operational holdings

<b>File groups and data files</b>	
<b>VII</b>	<b>Livestock products</b>
1	Milk
2	Meat
3	Egg
<b>VIII</b>	<b>Infrastructure</b>
1	Markets and roads
2	Banks and post offices
<b>IX</b>	<b>Domestic product</b>
1	Sector-wise GDP
<b>X<sup>2</sup></b>	<b>Environment (pixel generated)</b>
1	Actual Evapotranspiration (AET)
2	Potential Evapotranspiration (PET)
3	Climate Water Deficit (Def)
4	Precipitation (Ppt)
5	Maximum Temperature (Tmax)
6	Minimum Temperature (Tmin)

<sup>1</sup>. Variables in the data files are static, i.e., single point data, not time series.

<sup>2</sup>. Environment variables generated from Pixel level data.

## 2. Summary of Meso-level Database Documentation

The district level database for India is divided into two parts: apportioned and unapportioned. This document relates to the unapportioned database for all the districts in 20 states of India.

### States covered

Andhra Pradesh, Bihar, Gujarat, Haryana, Karnataka, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh, West Bengal, Chhattisgarh, Jharkhand, Uttarakhand, Assam, Himachal Pradesh, Kerala and Telangana.

### Years

1990-91 to 2017-18

#### Number of districts by state: 2017

State code	Name of State	Unapportioned	
		Number of districts in 2017	
1	Andhra Pradesh	13	
2	Bihar	38	
3	Gujarat	33	
4	Haryana	22	
5	Karnataka	31	
6	Madhya Pradesh	51	
7	Maharashtra	36	
8	Odisha	30	
9	Punjab	22	
10	Rajasthan	33	
11	Tamil Nadu	32	
12	Uttar Pradesh	75	
13	West Bengal	23	
14	Chhattisgarh	27	
15	Jharkhand	25	
16	Uttarakhand	13	
17	Assam	33	
18	Himachal Pradesh	12	
19	Kerala	14	
20	Telangana <sup>#</sup>	31	
<b>Total</b>		<b>594</b>	

<sup>#</sup> Since this state was formed in 2013, data is available only from 2014.

## Missing data

Missing data are shown as '-1' in the data files for the following cases:

- ◆ Complete year missing for all variables in a file (i.e., variable group) for selected states/year not included in the dataset.
- ◆ Missing for a few districts for some variables in a file.
- ◆ Missing for a specific crop/variable in a file for selected states (for instance, the crop is not grown in a particular state).

## Data format

The data are stored in Excel spreadsheet. The database is divided into 26 data files.

## Common variables

Each file in the database has the following four common identifier variables: State code, State name, District code and District name. Additional identifier variables related to agro-ecological zone, SAT and non-SAT are available in Appendix 2.

## Summary of datafiles

File description	Variable name
<b>Time series data files</b>	
Area and production	Rice, Wheat, Sorghum (kharif), Sorghum (rabi), Sorghum (total), Pearl millet, Maize, Finger millet, Barley, Chickpea, Pigeonpea, Minor pulses, Groundnut, Sesamum, Rapeseed and Mustard, Safflower, Castor, Linseed, Sunflower, Soyabean, Sugarcane, Cotton, Fruits, Vegetables, Total fruits and vegetables, Potato, Onion, Fodder
Area under HYV cereal crops	Rice, Wheat, Sorghum, Pearl millet, Maize, Finger millet, Total HYV area
Crop-wise irrigated area	Rice, Wheat, Sorghum (kharif), Sorghum (rabi), Sorghum (total), Pearl millet, Maize, Finger millet, Barley, Chickpea, Pigeonpea, Minor pulses, Groundnut, Sesamum, Rapeseed and Mustard, Linseed, Sugarcane, Cotton, Total fruits and vegetables
Source-wise irrigated area	Net irrigated area by Canals, Tanks, Tube wells, Other wells, Total wells, Net irrigated area and Gross irrigated area
Fertilizer consumption	Nitrogen, Phosphate, Potash, Total (NPK)
Seasonal fertilizer consumption	Nitrogen, Phosphate, Potash, Total (NPK) for kharif and rabi seasons
Land use	Geographical area, Forest area, Barren and uncultivable land, Land put to non-agricultural uses, Cultivable waste, Permanent pastures & other grazing land, Other fallow land, Current fallow land
Normal monthly rainfall	January-December normal rainfall, Annual normal rainfall
Actual monthly rainfall	Annual rainfall, January-December actual rainfall
Length of Growing Period	Length of growing period (days)
Soil type	Type of soil
Farm harvest prices	Rice, Paddy, Wheat, Sorghum, Pearl millet, Maize, Finger millet, Barley, Chickpea, Pigeonpea, Sugarcane (gur), Groundnut, Sesamum, Rapeseed and Mustard, Linseed, Castor, Cotton (kapas)

Contd...

File description	Variable name
Population Census	Total population, Male population, Female population, Total rural population, Male rural population, Female rural population, Total urban population, Male urban population, Female urban population, Total literates, Male literates, Female literates, Total rural literates, Male rural literates, Female rural literates, Total urban literates, Male urban literates, Female urban literates, Total cultivators, Male cultivators, Female cultivators, Total rural cultivators, Total urban cultivators, Male urban cultivators, Female urban cultivators, Total agricultural labour, Male agricultural labour, Female agricultural labour, Total rural agricultural labour, Male rural agricultural labour, Female rural agricultural labour, Total urban agricultural labour, Male urban agricultural labour, Female urban agricultural labour
Livestock Census	Total male and female cattle (crossbred + indigenous), Adult male cattle (crossbred + indigenous), Adult female cattle (crossbred + indigenous), Young male cattle (crossbred + indigenous), Young female cattle (crossbred + indigenous), Young male and female cattle (crossbred + indigenous), Total male and female buffaloes, Adult male buffaloes, Adult female buffaloes, Young male buffaloes, Young female buffaloes, Young male and female buffaloes, Total sheep (adult + young stock), Total goats (adult + young stock), Total horses (adult + young stock), Total donkeys (adult + young stock), Total camels (adult + young stock), Total pigs (adult + young stock), Total livestock (excluding dogs), Total poultry
Agricultural Census	Marginal number, Marginal area (below 1 ha); Small number, Small area (1 to 2 ha); Semi-medium number, Semi-Medium area (2 to 4 ha); Medium number, Medium area (4 to 10 ha); Large number, Large area (above 10 ha); Total number, Total area
Markets and roads	Principle markets, (Nos), Sub-markets (Nos), Total markets (Nos), Road length (Kms)
Field labour wages	District wage rate (₹), State wage rate (₹)
GDP	Primary Sector GDP (current and constant), Secondary sector GDP (current and constant), Tertiary sector GDP (current and constant), Total GDP (current and constant)
<b>Environment variables</b>	
Precipitation	January-December condensation of atmospheric water vapour that falls under gravity
Minimum temperature	January-December lowest temperature attained at a specific location during a specified period
Maximum temperature	January-December highest temperature reported for a given location during a given period
Q	January-December runoff: When rain or snow falls onto the earth, it starts moving along the slopes. A portion of it seeps into the soil and replenishes the groundwater. Most of it flows downhill as runoff when rainfall intensity is more than seepage or infiltration.
Potential Evapotranspiration	January-December Potential Evapotranspiration
Actual Evapotranspiration	January-December actual evapotranspiration: It is the actual amount of water lost to evapotranspiration from the soil-plant continuum by an actively growing plant or crop. Water loss through evapotranspiration depends upon plant and soil characteristics, and on the amount of available water in the soil.
Climate Water Deficit	January-December Climate Water deficit

### 3. List and Description of Data Files

#### Crops Area & Production

**Filename :** DT-AREA-PROD-U.XLS      **No. of records**      13965  
**Years :** 1990 to 2017      **Date of last update :** May 2019  
**Units :** Area in '000 hectares, Production in '000 tons, Yield in kg/ha

S.No.	Abbreviation	Description of variables
1	STCODE	State code
2	STNAME	State name
3	DIST	District code
4	DISTNAME	District name
5	YEAR	Year (1991 onwards)
6	RICE_TA	Rice area
7	RICE_TQ	Rice production
8	WHT_TA	Wheat area
9	WHT_TQ	Wheat production
10	SORG_KA	Kharif sorghum area
11	SORG_KQ	Kharif sorghum production
12	SORG_RA	Rabi sorghum area
13	SORG_RQ	Rabi sorghum production
14	SORG_TA	Total sorghum area
15	SORG_TQ	Total sorghum production
16	PMLT_TA	Pearl millet area
17	PMLT_TQ	Pearl millet production
18	MAIZ_TA	Maize area
19	MAIZ_TQ	Maize production
20	FMLT_TA	Finger millet area
21	FMLT_TQ	Finger millet production
22	BRLY_TA	Barley area
23	BRLY_TQ	Barley production
24	CPEA_TA	Chickpea area
25	CPEA_TQ	Chickpea production
28	PPEA_TA	Pigeonpea area
29	PPEA_TQ	Pigeonpea production
30	MPUL_TA	Minor pulses area (includes all pulses other than chickpea and pigeonpea)
31	GNUT_TA	Groundnut area
32	GNUT_TQ	Groundnut production

*Contd...*

*Contd...*

S.No.	Abbreviation	Description of variables

34	SESA_TQ	Sesamum production
35	RM_TA	Rapeseed and mustard area
36	RM_TQ	Rapeseed and mustard production
37	SAFF_TA	Safflower area
38	SAFF_TQ	Safflower production
39	CAST_TA	Castor area
40	CAST_TQ	Castor production
41	LINS_TA	Linseed area
42	LINS_TQ	Linseed production
43	SUNF_TA	Sunflower area
44	SUNF_TQ	Sunflower production
45	SOYA_TA	Soyabean area
46	SOYA_TQ	Soyabean production
49	SCAN_TA	Sugarcane area
50	SGUR_TQ	Sugarcane (gur) production
51	COTN_TA	Cotton area
52	COTN_TQ	Cotton (lint) production
53	FRUT_TA	Fruits area
54	VEGT_TA	Vegetables area
55	TFV_TA	Total fruits and vegetables area
56	POTA_TA	Potato area
57	ONIO_TA	Onion area
58	FOD_TA	Fodder area

## Crop-wise Irrigated Area

**Filename** : DT-CIA-U.XLS      **No. of records** : 12479  
**Years** : 1990 to 2017      **Date of last update** : May 2019  
**Units** : '000 hectares

S.No.	Abbreviation	Description of variables
1	STCODE	State code
2	STNAME	State name
3	DIST	District code
4	DISTNAME	District name
5	YEAR	Year (1991 onwards)
6	RICE_TAI	Rice area irrigated
7	WHT_TAI	Wheat area irrigated
8	SORG_KAI	Kharif sorghum area irrigated
9	SORG_RAI	Rabi sorghum area irrigated
10	SORG_TAI	Total sorghum area irrigated
11	PMLT_TAI	Pearl millet area irrigated
12	MAIZ_TAI	Maize area irrigated
13	FMLT_TAI	Finger millet area irrigated
14	BRLY_TAI	Barley area irrigated
15	CPEA_TAI	Chickpea area irrigated
16	PPEA_TAI	Pigeonpea area irrigated
17	GNUT_TAI	Groundnut area irrigated
18	SESA_TAI	Sesamum area irrigated
19	RM_TAI	Rapeseed and mustard area irrigated
20	LINS_TAI	Linseed area irrigated
21	SCAN_TAI	Sugarcane area irrigated
22	COTN_TAI	Cotton area irrigated
23	TFV_TAI	Total fruits and vegetables area irrigated
24	MPUL_TAI	Minor pulses area irrigated (includes all pulses other than chickpea and pigeonpea)
25	PULS_TAI	Pulses area irrigated
26	FOD_TAI	Fodder area irrigated

## Area under HYV Cereal Crops

**Filename** : DT-HYV-A.XLS      **No. of records** : 6406  
**Years** : 1990 to 2015<sup>1</sup>      **Date of last update** : May 2019  
**Units** : '000 hectares

S.No.	Abbreviation	Description of variables
1	STCODE	State code
2	STNAME	State name
3	DIST	District code
4	DISTNAME	District name
5	YEAR	Year (1991 onwards)
6	RICE_TAH	Rice HYV area
7	WHT_TAH	Wheat HYV area
8	SORG_TAH	Sorghum HYV area
9	PMLT_TAH	Pearl millet HYV area
10	MAIZ_TAH	Maize HYV area
11	FMLT_TAH	Finger millet HYV area
12	TOTAL_HYV	Total HYV area

<sup>1</sup> HYV area is not available for many states in continuous years. For details, refer to the section on 'Available data and missing data'.

---

## Land use

---

**Filename** : DT-LANDUSE-U.XLS      **No. of records** : 13671  
**Years** : 1990 to 2017      **Date of last update** : May 2019  
**Units** : '000 hectares

---

S.No.	Abbreviation	Description of variables
1	STCODE	State code
2	STNAME	State name
3	DIST	District code
4	DISTNAME	District name
5	YEAR	Year (1991 onwards)
6	TOTGEOG	Geographical area/Reporting area for land utilization statistics (RLU)
7	FOREST	Forest area
8	BARREN	Barren and uncultivable land
9	NONAGRI	Land put to non-agricultural uses
10	CWASTE	Cultivable waste
11	PPASTUR	Permanent pastures & other grazing land
12	OTFALOW	Other fallow lands
13	CUFALOW	Current fallow lands
14	NCA	Net cropped area or Net Sown Area
15	GCA	Gross cropped area or Total Cropped Area

---

## Source-wise irrigated area

---

**Filename** : DT-SIA-U.XLS      **No. of records** : 12795  
**Years** : 1990 to 2017      **Date of last update** : May 2019  
**Units** : '000 hectares

---

S.No.	Abbreviation	Description of variables
1	STCODE	State code
2	STNAME	State name
3	DIST	District code
4	DISTNAME	District name
5	YEAR	Year (1991 onwards)
6	CANALS	Net irrigated area by canals
7	TANKS	Net irrigated area by tanks <sup>1</sup>
8	TUBEWELL	Net irrigated area by tube wells
9	OTHWELL	Net irrigated area by other wells <sup>2</sup>
10	TOTWELL	Net irrigated area by total wells
11	OTHSOUR	Net irrigated area by other sources
12	NIA	Net irrigated area
13	GIA	Gross irrigated area

---

<sup>1</sup> Data for Maharashtra combines the area irrigated under canals, tanks and other sources under 'surface irrigation'. Data for surface irrigation are listed under the variable 'Net irrigated area by tanks'.

<sup>2</sup> For Odisha, the variable 'Net irrigated area by other sources' is included under the variable 'Net irrigated area by other wells'.

## Farm Harvest Prices (All Crops)

<b>Filename</b>	: DT-FHP-U.XLS	<b>No. of records</b>	12330
<b>Years</b>	: 1990 to 2016	<b>Date of last update</b>	: May 2019

## 4. Data Clarification and Anomalies

### Clarifications and Anomalies in the Data

#### Area and production

- ◆ ‘Paddy’ production figures refer to ‘rice’ production for all districts. For ‘West Bengal’ and ‘Karnataka’, production was reported for ‘paddy’ only in some years. These were converted into ‘rice’ by using 0.66 as the conversion factor.
- ◆ ‘Cotton’ production is reported in terms of ‘lint’. In the data sources, production is reported in bales of 170 kg each. These were converted into ‘000 tons for all districts.
- ◆ The production figure for ‘sugarcane’ refers to ‘raw sugar’ (gur). Sugarcane production was converted into raw sugar by taking 10% of cane production.
- ◆ ‘Minor pulses’ include all pulses other than chickpea and pigeonpea, e.g., green gram, black gram, horse gram, lentil, cowpea, moth bean, etc.
- ◆ Production data was not available for ‘total fruits’, ‘vegetables’, ‘potato’ and ‘onion’.
- ◆ For Jharkhand paddy, APY data is from state sources.
- ◆ For Odisha state, crop wise area, production and yield data is from the State Directorate of Agriculture and Food Production.
- ◆ In some cases, ‘crop production’ may be reported while ‘crop area’ is listed as ‘0’, i.e., less than 500 ha. This generally occurs for crops of minor importance in specific states/districts.
- ◆ For ‘sorghum’, crop area and production under summer crop are included in the rabi season.
- ◆ For season-wise paddy, area and production, early kharif is shown under kharif, late kharif under rabi and rabi paddy under summer (in states where early and late kharif sowing are practiced).

#### Farm harvest prices

- ◆ Both ‘rice’ and ‘paddy’ prices were included depending on the availability of data from the source. These prices are mainly for coarse paddy/rice.
- ◆ ‘Cotton’ prices are for ‘kapas’ i.e., raw cotton. In some states, cotton prices are reported for several cotton varieties. The price of the most dominant variety is reported. For Punjab and Haryana, we have used an average of American and Desi cotton.
- ◆ ‘Sugarcane’ prices were reported for ‘raw sugar’ (gur) prices.
- ◆ ‘Season-wise’ farm harvest prices are not available in this dataset.
- ◆ ‘Cotton prices’ for ‘Maharashtra’ state were not available from 1973 onwards due to monopoly procurement by the government.
- ◆ For ‘Odisha’, farm harvest prices were not reported/released from 1988 onwards.
- ◆ Farm harvest prices were not reported for several districts where the crop is of minor importance or relatively less important. In such cases, the missing data are shown as ‘-1.’

## Crop-wise irrigation

- ◆ For some crops, crop-wise irrigated area exceeds the actual area under the crop. This can occur when data comes from different sources. No adjustments were made to correct this inconsistency in our dataset.
- ◆ For 'Odisha', data on this variable was available from 1972 onwards.
- ◆ For 'West Bengal', data on this variable was not available.
- ◆ For Maharashtra crop-wise irrigation not available after 2002

## Source-wise irrigation

- ◆ Data on the variable 'dug wells' was included in the variable 'other wells'.
- ◆ For 'Odisha', source-wise irrigated area values were only available from 1970 onwards. Source-wise net irrigated area values were not available from 1977 to 1981 and from 1984 to 1987; instead source-wise gross irrigated areas are reported. The variable 'other sources' of irrigation is included under the variable 'other wells'.
- ◆ From 1975 onwards, data for Maharashtra combines area irrigated under canals, tanks and other sources under 'surface irrigation'. For our purposes, data for surface irrigation are listed under the 'tanks' variable.
- ◆ For 'West Bengal', data on source-wise irrigation was not available.
- ◆ Data on canals was available only for some years.
- ◆ Data was not available for Maharashtra from 2002 onwards.
- ◆ Source-wise irrigation data was available for Gujarat for select years since 2007.
- ◆ From 2000 onwards, for Karnataka, 'lift irrigation' data was included in the 'other sources' variable.

## Area under HYV cereals

- ◆ For 'finger millet', area under HYVs was available only from 1990 onwards.
- ◆ 'HYV area' under a selected cereal may exceed actual area under that crop for some districts in ~~sone~~ states. Again, this may occur when data comes from different sources. In such cases, no adjustments have been made in the data.
- ◆ For 'West Bengal', area under HYVs was not available from 1988 onwards.
- ◆ Since 2010, many states have not reported area under HYVs as they have reached saturation point.

## Gross and net irrigated area

- ◆ For 'West Bengal', data on net and gross irrigated areas was not available from 1985 onwards.
- ◆ For Maharashtra data not available from 2002

## Land use

- ◆ Area under 'miscellaneous tree crops and groves' was not included in the dataset.
- ◆ 'Geographical area' is reported instead of 'RLU' (Reporting area for land use statistics), for some states/districts for some years. Reporting area stands for the area for which data on land use classification is available i.e., the sum of area under different land use classifications generally equals the RLU.
- ◆ For 'Odisha', land use data values were available only from 1972 onwards.
- ◆ In some states like MP and Chhattisgarh in a few districts geographical area increases and decreases based on changes in forest area

## Fodder area

- ◆ For 'Bihar', 'West Bengal', 'Assam', 'Himachal Pradesh' and 'Kerala', data for fodder area was available from 1970 onwards.

## Livestock

- ◆ Adult 'cattle' and 'buffaloes' are the sum of crossbred and indigenous breeds. For crossbred cattle, an 'adult' is over 2½ years old and for indigenous breeds, it is over 3 years. In many states, the time of collection of livestock census data does not match. Hence the years reported vary from state to state, particularly in later years.

## Roads and markets

- ◆ Data gaps need to be filled by interpolation, wherever required.
- ◆ Markets total includes main and sub-markets. However, the data for sub-markets can be erratic as some of them may not be functioning in some or many years.
- ◆ Road length increases consistently in all states over time. However, there may be decrease or big increase in road length in some years when rural roads are excluded or included from the total road length in some years varying across states.

## Starting year of data for newly formed districts

- ◆ The data for newly formed districts generally appears after 1-2 years of its formation. However, there are cases where the data appear 1-2 years prior to its formation. This can happen due to lag of 2-3 years for latest available data.
- ◆ There are also a few instances where the starting year of data for a newly formed district vary across the key core files.

## Length of Growing Period (LGP)

- ◆ The growing period is the period when the moisture in the soil is adequate to support plant growth. LGP was calculated following the FAO model (Higgins and Kassam 1981). The growing period, as per the model, starts when precipitation (P) exceeds 0.5 potential evapotranspiration (PE) and ends with the utilization of an assumed quantum of available stored soil moisture assumed as 100 mm, except for Vertisols (250 mm) after P falls below PE. The period (in days) calculated for each observation site was plotted and isolines drawn at specified intervals. Observed rainfall data for over 200 locations was taken as a base for the whole of India. Data for missing districts was estimated from the nearest districts located in a similar agro-ecological region. PE data are estimated (by the modified Penman's method); these are published by IMD. In some cases, PE estimated by Hargreaves method has been included.

# 5. Available and Missing Data

Missing data are provided from 1990 to 2015. Data could be missing because: (a) data were not published /not available or (b) crop activity was unimportant in the state or a few districts in the state; hence data was not recorded for area, production, crop-wise irrigation, and FHP for such crops.

Missing data can be grouped into 3 categories:

- ◆ Complete year missing for all variables in a file (i.e., variable group) for selected states. For example, several years' data for crop-wise irrigated area, source-wise irrigated area, and land use statistics are missing for West Bengal.
- ◆ Data missing for a few districts for some variables in a file. Such cases are few and restricted to a few variables in a file.
- ◆ Data missing for a specific crop/variable in a file for selected states. (For example, potato and onion area data are not reported for some states in the sources available with us).

**Available data and missing data for Andhra Pradesh from 1990 to 2017.**

Variables	Years data is available	Years data is missing
Area and production (crops)	1990 to 2017	-

Farm harvest prices - crops	1990 to 2016	-
Fertilizer consumption	1990 to 2017	-
Rainfall - Annual & monthly	1990 to 2015	-
Markets (main and sub-markets)	1990 to 2010, 2013	2011 to 2012, 2014 to 2015
Roads (total road length)	1990 to 2010, 2012 to 2014	2011, 2015
Livestock census	1992, 1997, 2003, 2007, 2012	-
Agri. implements and machinery	1992, 1997, 2003, 2007	-
Operational holdings	1990, 1995, 2000, 2005, 2010	-
Population census	1991, 2001, 2011	-
Agricultural wages (men & women)	1990 to 2015	

#### Available data and missing data for Uttar Pradesh from 1990 to 2017.

Variables	Years data is available	Years data is missing
Area and production (crops)	1990 to 2017	-
Land use	1990 to 2016	-
Crop-wise irrigated area	1990 to 2016	-
Source-wise irrigated area	1990 to 2016	-
HYV area	Not Available	1990 to 2015
Farm harvest prices - crops	1990 to 2015	-
Fertilizer consumption	1990 to 2017	-
Rainfall - Annual & monthly	1990 to 1995, 1997 to 1999, 2002, 2004 to 2015	1996, 2000, 2001, 2003
Markets (main and sub-markets)	1990 to 1994, 1998, 2001 to 2014, 2016 to 2017	1995 to 1997, 1999, 2000; 2015
Roads ( total road length)	1990 to 1995, 1999 to 2000 to 2017	1998, 2002; 2012
Livestock census	1993, 1997, 2003, 2007, 2012	-
Agri. implements and machinery	1993, 1997, 2003, 2007	
Operational holdings	1990, 1995, 2000, 2005, 2010	
Population census	1991, 2001, 2011	-
Agricultural wages (men & women)	1990 to 1901, 2003 to 2015	2002

**Available data and missing data for West Bengal from 1990 to 2017.**

Variables	Years data is available	Years data is missing
Area and production (crops)	1990 to 2017	-

Agricultural wages (men & women)	1991 to 2001, 2003 to 2015	2002

## 6. Data Sources

Data was downloaded from online sources wherever available and soft and published hard copied were collected from the respective state departments. Soft copies and published hard copies that include season and crop reports, statistical abstracts, statistical handbooks, agricultural statistics, district handbooks, integrated sample survey reports (livestock and products), infrastructure statistics, farm harvest price for principal crops of India, agricultural wages in India, fertilizer statistics, etc were used to update the database. For environment variables, district-level data was generated from pixel-level data from Terra Climate database.

Data Sources for key variables groups	
Data	Source
Area, production and yield (APY)	Directorate of Economics and Statistics (DES, Delhi); State DES; State Directorate of Agriculture DOA
Area under HYV cereal crops	State DES; State Directorate of Agriculture DOA
Crop-wise Irrigation	DES, Delhi; State DES; State Directorate of Agriculture DOA
Source-wise Irrigation	DES, Delhi; State DES; State Directorate of Agriculture DOA
Land use	DES, Delhi; State DES; State Directorate of Agriculture DOA
Rainfall (monthly, normal)	State DES; Indian Meteorological Department
Length of Growing Period (LGP)	ICRISAT
Soil type	ICRISAT
Fertilizer consumption	Fertilizer Association of India, Delhi
Wages	DES, Delhi
Farm Harvest Price	DES, Delhi
Population	Census data Registrar General of India
Livestock	State Dept. of Animal Husbandry and Dairying
Agricultural implements	State Dept. of Animal Husbandry; State DES
Operational holdings	Agricultural Census data
Milk, meat, egg production	State Dept of Animal Husbandry and Dairying
Markets and roads	State Directorate of Agriculture Marketing; Public Works Department (PWD); State DES
Banks and post offices	State DES
Veterinary institutions	State Dept. of Animal Husbandry and Dairying
Health	State DES
Sector-wise GDP	State DES/CMIE database
Environment data	Terra Climate database
